

Salt chlorination
without complication.

POOL LAB3® SALT CHLORINATION

Economical Operation. Complete Sanitisation.

Using all the core functionality of the Classic and Plus series, the PL ECO is a low cost, fully automatic and self cleaning chlorinator suiting domestic pools up to 60,000 litres.

- **Control Panel**

Simple to set times and operate with no complicated menus to navigate through.

- **Heavy Duty Control Unit**

Weather proof and suitable for outdoor installations with display cover to screen.

- **Compatible with all Mineral Salt Additives**

The PL ECO will operate with all mineral salt additives.

- **Automatic Self-Cleaning Cells**

The microprocessor automatically reverses the polarity of the electrolytic plates to maximise the self-cleaning process.

- **Automatic Low & High Salt Warning**

If salt levels fall outside the optimum range, the diagnostic display scrolls an alert.

PL Eco Chlorinator Specification Chart:

MODEL	SALT LEVEL (PARTS PER MILLION)	CHLORINE GAS OUTPUT (GMS PER HOUR)	MAX. POOL SIZE INDOOR	MAX. POOL SIZE OUTDOOR
PLECO	5600	25	90,000	60,000

**Due to ongoing research and development, Poolpower reserves the right to alter specifications without notice.*
